- Good for peeling off cut-out foil letters, logos and symbols

Item No.	Description
PIZ1	Special Tweezers

Metal hole punch

- Very simple to use
- Used to punch inspection date labels

Item No.	Description
206	Metal hole punch

Awarded the highest rating three times. SECUMAX 150 overcomes several challenges at once. Maximum amount of safety: The concealed blade will neither come close to you nor to your goods. A high degree of versatility: You can cut, scrape and scratch - without needing another cutter. The best possible comfort: The SECUMAX 150 has been ergonomically formed and is very light at only 24 g. In short: The cutting tool you have waited for.

Item No.	Description
FS150	Secumax 150

3in1 blade head

If every grip of the hand is to grasp well then it requires versatile aids - such as the SECUMAX 150. You can not only cut with it. You can also scratch open adhesive tape and scrape off residue on smooth surfaces.

Concealed blade

The safety cutter can be used without a sharp blade tip. Instead, its blade head is so narrow and the two cutting edges so large, that you can open double layered cardboard boxes and much more safely with it.

Good guide surfaces

Another reason why the SECUMAX 150 can deal so easily with cardboard boxes? It is because of the guide surfaces right at the front on the handle. They can help you to cut diagonally. And to cut through more easily in this way.

No blade change

The SECUMAX 150 is a disposable cutter. Thus, the blade will not get lost during work - or hurt you when changing it. You can simply dispose of the SECUMAX 150 into a sharps bin.

Ergonomically shaped

Are you right-handed? Left-handed? It's actually all the same. Because the SECUMAX 150 adapts to any hand. The pleasant "designed comfort" is supported by the light arching of the outer edges and the surface structure that can be gripped.

Foil Cutter

- Foil Cutter for cutting off your vinyl foil
- Very precise, premium blades
- Including one replacement blade

Item No.	Description
FS25	Foil Cutter
FS25E	10 replacement Blades
